

Unlock a whole new world
of digital entertainment with
Intel® Viiv™ Technology.

Maximize your digital entertainment experience with Intel® Viiv™ Technology!

From home movies and the latest studio releases to family photos, music and more, the ability to access and enjoy digital content on your own terms is what truly defines home entertainment. Now you can take control of all your favorite digital entertainment with new Intel® Viiv™ technology.

Intel Viiv technology combines the power and connectivity of a PC with the world of consumer electronics to provide access to numerous entertainment options. With an Intel Viiv technology-based PC, you control the movies, music,

games and photos you want to enjoy; both from your personal collections and from a host of online service providers verified to work with Intel Viiv technology—just look for the Intel Viiv Identifier. You can even choose the style of PC that best suits your home, from a sleek DVD-like design to a more traditional tower model.

Powered by an Intel dual-core processor, Intel Viiv technology supports up to 7.1 surround sound for an incredible home theater-quality experience. And with a remote control[^], you can easily find and share the digital content you want. So sit back, kick up your feet, and start enjoying digital home entertainment like never before.

[^] Remote control may be sold separately.

¹ Home networking capability and many Intel® Viiv™ technology-based usage models will require additional hardware devices, software or services. Functionality of Intel® Viiv™ technology verified devices will vary; check product details for desired features. System and component performance and functionality will vary depending on your specific hardware and software configurations. See www.intel.com/go/viiv_info for more information.

Take control of your digital entertainment experience.

With your Intel® Viiv™ technology¹-based PC connected to your TV, you can browse through a family photo album with a remote control. Watch your favorite independent film or home movie. Fill your living room with the sounds of today's hot hits. Or grab a gamepad and test your knack for the latest online games. Intel Viiv technology helps put you in control of the digital content you want with plenty of entertainment choices. Choose content from your own personal collections, or enjoy something new from a variety of Intel Viiv™ technology verified online service providers.

Intel Viiv technology¹ verified services and applications are available across the globe. Here is a sampling of those available today:

Movielink* (US, Canada)	Final Fantasy* XI (Japan)
AOL* Music on Demand (US)	Detective Office 5* (Japan)
Turner* GameTap* (US, Canada)	CANALPLAY (France)
ESPN* Full Court (US)	Afendis* one4movie* (Germany)

Sohu.com* (China)	Peter Jackson's King Kong*: The Official Game of the Movie (US, Canada, France, Germany, Japan)
SMGBB* G-Cool TV* (Korea)	

Share your digital content in your home.

Gone are the days of huddling around a small PC monitor to view photos or watch a favorite movie clip. Now you can share your digital files with family and friends on a television in the comfort of your own living room. Multiple people can also enjoy different digital media in different rooms simultaneously with an Intel Viiv technology¹-based PC powered by an Intel dual-core processor, using devices connected through a home network. You can even sync your media files with handheld devices and take your digital content wherever you go—the powerful Intel dual-core processor enables quick encoding for handhelds, saving you time.

[^] Remote control may be sold separately.

Simplify your digital entertainment experience.

Enjoy the simplicity of having all your favorite digital content in one convenient, easy-to-access location! A single Intel Viiv technology-based PC can deliver the functionality of your favorite entertainment components to create an extraordinary digital entertainment experience. Intel Viiv technology also makes it simple to download news, movies, music files, games and more from your choice of Intel Viiv™ technology verified online service providers, as well as choose digital content from your own personal collections. Accessing your favorite content is fast thanks to instant on/off functionality that allows your entertainment PC to turn on and off quickly, like a television (after initial boot, when activated).

Start experiencing Intel® Viiv™ Technology today.

- Connect your Intel Viiv technology-based PC to a monitor in your den or to a television and sound system in your living room
- Connect your Intel Viiv technology-based PC to a broadband connection
- Turn on the PC, then sit back with the handy remote[®] and start enjoying!

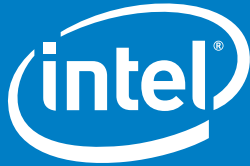

Digital entertainment in your home.

Upload pictures and home videos and enjoy them on the big screen. Pop in a CD or DVD from your own personal media collection. Or using the remote, select *Online Spotlight* to choose from an assortment of content. Download news, movies, music files, games and more from a wide variety of Intel Viiv technology¹ verified service providers. With the addition of a TV tuner card, you can even record, pause and rewind live television programs, and store them on the hard drive for viewing later. Whatever kind of digital entertainment experience you're in the mood for, Intel Viiv technology can help bring it to life right in your own home.

Digital entertainment on the go.

Intel Viiv technology makes it easy to take along your favorite digital content when you're on the move. Whether you want to listen to music, watch movies or view photos, simply sync your handheld device with the digital media on your Intel Viiv technology-based PC and you're ready to go—the Intel dual-core processor delivers ample power and performance to quickly encode digital files for your laptop and handheld devices, so you can get on your way sooner.
